webundefined.com

San Diego, CA

PROFILE

I am currently working for my self created web design company Web Undefined (see webundefined.com for portfolio) with a focus on smooth, slick, and modern UI/UX, streamlined functionality, and strong client communication. I left software engineering at the start of 2021 so that I would have more creative control over my work. While I find engineering to be fun and satisfying, the visual aspect of web design/development has always been where I've always felt the most comfortable.

SKILLS

HTML & CSS

JavaScript & jQuery

Bootstrap & Flexbox

WordPress

SQL

PASSIONS

Travel

Design

Media

Music

EDUCATION

Rhode Island College, 2012 - 2017
